

Zoological Society of London (ZSL) are undertaking a massive Seagrass Restoration Project to save the River Thames.

This initiative is known as “Restoring the Thamescape” catalyzing the recovery of coastal habitats mainly Native Oyster, Seagrass habitat and Saltmarsh habitat in the Medway Swale Estuary as shown here.

The Vision is to grow this project with the help of Rotary Grants for long-term sustainability. Seagrass focuses on Peace, Environment and Education.

Rotary Club of London (UK) is a partner of ZSL, with support from Royal Thames Yacht Club.,
